

TSA Pre✓™ Expands to 60 Additional Airports *More Passengers Able to Experience Expedited Screening*

WASHINGTON — The Transportation Security Administration (TSA) announced today that it will expand its TSA expedited screening program to 60 new airports in addition to the existing 40, bringing the total number of airports with TSA Pre✓™ to 100. These airports are expected to have TSA Pre✓™ lanes at select checkpoints by the end of the year.

The agency also will expand the number of TSA Pre✓™ lanes and availability at the existing 40 airports in the coming weeks.

TSA Pre✓™ is an expedited screening program that allows pre-approved airline travelers to leave on their shoes, light outerwear and belt, keep their laptop in its case and their 3-1-1 compliant liquids/gels bag in a carry-on in select screening lanes. To date, more than 15 million passengers have experienced TSA Pre✓™ since it launched in October 2011.

“As TSA continues to move away from a one-size-fits-all approach to transportation security, we are looking for more opportunities to provide the most effective security in the most efficient way possible,” said TSA Administrator John S. Pistole. “Expanding TSA Pre✓™ to more locations enables many more passengers across the country to experience expedited screening.”

Passengers who are eligible for TSA Pre✓™ include U.S. citizens of frequent traveler programs invited by participating airlines. Additionally, U.S. citizens who are members of a U.S. Customs and Border Protection (CBP) Trusted Traveler program and Canadian citizens who are members of CBP’s NEXUS program qualify to participate. Later this year TSA will [launch an application program](#), allowing more U.S. citizens to enroll in TSA Pre✓™.

Eligible passengers traveling on Alaska Airlines, American Airlines, Delta Air Lines, Hawaiian Airlines, United Airlines, US Airways and Virgin America may receive expedited screening benefits. JetBlue and Southwest are expected to begin participating when operationally ready.

If a passenger is eligible for expedited screening, a TSA Pre✓™ indicator will be embedded in the barcode of the boarding pass so that when scanned at the checkpoint, the passenger may be referred to a TSA Pre✓™ lane. Many participating airlines already print a TSA Pre✓™ indicator directly on the boarding pass so passengers will know in advance they have been cleared for expedited screening. TSA will always incorporate random and unpredictable security measures throughout the airport. No individual will be guaranteed expedited screening.

Travelers can check [TSA.gov/TSA-Precheck](https://www.tsa.gov/TSA-Precheck) for information on locations and hours of active TSA Pre✓™ lanes.

The Transportation Security Administration (TSA) was created in the wake of September 11, 2001, to strengthen the security of the nation’s transportation systems and ensure the freedom of movement for people and commerce. Today, TSA secures the nation’s airports and screens all commercial airline passengers and baggage. TSA uses a risk-based strategy and works closely

with transportation, law enforcement and intelligence communities to set the standard for excellence in transportation security. TSA's workforce comprises approximately 50,000 frontline officers who screen approximately 1.8 million travelers each day at more than 450 airports nationwide. For more information about TSA, please visit our website at www.tsa.gov.
