## Record March 2023 Passenger Numbers

**OKLAHOMA CITY, April 24, 2023** – Will Rogers World Airport (OKC) had a record for passenger traffic for March 2023. For the month OKC had 391,389 passengers which is 22% higher than 2022 and 10.6% higher than the previous record in March 2019. There were, also a record 980,188 passengers that flew in and out of OKC from January through March. So far this year, WRWA has outperformed the airport's previous record set in 2019 by 44,845.

“The strength of the OKC air service market is evident despite higher fares and fewer flights compared to 2019” said Jeff Mulder, Director, Department of Airports. “The airlines have not restored all of our markets since COVID due to a lack of pilots. The passengers have returned in record numbers and we expect as the airlines continue to recover, we will continue to see a great future at OKC”.
