

Safety Policy Statement

March 1, 2024

OKC Will Rogers International Airport (OKC) made a commitment to prioritize safety by implementing a Safety Management System (SMS). This system will enable Airport management, employees, airlines, tenants, and other business partners to operate in a safe environment. The Airport aims to create an atmosphere that minimizes exposure to risks and hazards, encourages continuous safety improvement, and supports confidential, non-punitive reporting. OKC is dedicated to providing policy direction and resources to ensure the SMS's success, compliance with standards and regulations, and enhanced operational safety.

Safety is everyone's responsibility, and all employees are expected to communicate any safety-related conditions, incidents, or accidents that may compromise the Airport's integrity. This communication is free of any form of reprisal; however, this policy does not apply to illegal acts or deliberate, willful disregard of promulgated regulations or procedures.

Sincerely,

A handwritten signature in blue ink that reads "Jeff Mulder".

Jeff Mulder, Director

OKC Will Rogers International Airport
